

User Personas and User Stories

Yanli Wang | CS5610 | Portfolio Project

User Personas

Alex - Technical recruiter. Alex reviews applications for software roles and wants to understand my background and project experience quickly. Clear summaries and descriptions of my own contributions help Alex decide whether to arrange an interview.

Jamie - Potential collaborator. Jamie is a computer science student interested in NLP and computer vision. Jamie wants to see how my projects work through simple explanations, visual examples, and code links.

User Story 1 Learn about my background

As a recruiter, Alex wants to understand my background so that they can assess my experience. After opening my portfolio from a resume, Alex reads my introduction and selects a project card to learn more.

User Story 2 Explore the NLP project

As a potential collaborator, Jamie wants to understand the NLP project so that they can decide whether to discuss it with me. Jamie opens the project page, reads the methods and my contribution, and follows the GitHub link to view the code.

User Story 3 View motion examples

As a visitor interested in computer vision, Jamie wants to see motion examples so that they can understand the project without running it. Jamie opens the vision page, selects Squat, and sees the matching image and a short explanation.
